Work Experience:

1) **Project: HSBC CRM Application**

Client: HSBC Bank PLC (London)

Domain: Corporate Investment Banking (CRM testing)

Duration: From Aug 2007 to till date

Tool: Quality Center 9.2, Lotus Notes 6.5, Rational Team Concert, QTP11.0, TestComplete 8.50.

Project Description: CRM project is CIBM's (Corporate Investment Banking) strategic Client Relationship Management application, and is the key tool used by HSBC client-facing executives to record and share information relating to our strategy and plans for each client.

Responsibilities:

- Technical Team Lead for the project and managing team of 6 people
- UAT Test scripting and execution
- Automating test cases using TestComplete 8.50 and Selenium TestNG Java
- Weekly and Daily status report
- Scrum Master
- Client interaction for status updates.
- Estimation preparation for both Manual and Automation testing
- Defect Management
- Helping Test Manager to Prepare Test plan
- Creation of Traceability Matrix
- Coordinating with Business Users during UAT
- Preparing training plan for new joiners and conducting training sessions

2) **Project: HSBC Takaful (Insurance) UAT**

Client: HSBC Amanah Takaful Bh.d (Kuala Lumpur)

Location: Malaysia (Kuala Lumpur)

Domain: Insurance

Duration: From Mar 2006 to Aug 2007

Tools: Quality Center 8.0

Project Description: HSBC Amanah Takaful, the business, is intending to launch its Insurance products. In order to support the business, HSBC Amanah Takaful has procured a third party solution from Malaysian vendor PentaSoft. The application, Pentasoft ISF, is an existing product and has been successfully deployed in various sites in several countries. The scope of the project covers user acceptance testing (UAT) of the following modules of the Pentasoft ISF application –

1. Takaful (Insurance) Life
2. Takaful (Insurance) General

Responsibilities:

- **Onsite Coordinator for the project.**
- Responsible for system and integration testing based on the requirements.
- Responsible for test and defect management
- Liaising with Business Analysts to confirm/clarify requirements as necessary
- Follow-up issues with the development team on the reported bugs
- Team leading and coordinating UAT with client.
- Creating test reports and handling Defect meetings with Business Analyst & testers.

3) Project: HUB (HSBC Universal Banking)

Client: HSBC Bank (Canada)

Employer: HSBC Software Development India Pvt.Ltd.

Duration: From Dec 2005 to Mar 2006

Tools: Quality Center, AS400

Project Description: Canada Group Development (CGD) is one of the regional IT centers of HSBC involved in the development of various applications to be used by HSBC. CGD is driving the HUB R2 program and GLT is likely to undertake the testing of R2 components developed by CGD.

The GLT test team is part of the Testing CoE at GLT. This team will assist the CGD HUB CoE testing team to conduct Functional Testing, Technical Testing and Batch Testing.

GLT is currently engaged with CGD (HUB CoE) for the following HUB related testing projects.

Primary domain: - Internet Banking

Responsibilities:

- Test Case writing
- Test case review
- Test Case Execution (Functional testing, Component testing, Integration testing)
- Test Management
- Defect management
- Test status report

4) Project: Personal Internet Banking -2nd Generation (P2G)

Client: HSBC Bank (United States)

Domain: Banking

Duration: From Aug 2005 to Dec 2005

Tools: Test Director, Mainframes (CICS), DB2, Quicken 2005/2006, Amacis (IBM Mail client)

Project Description: PIB / BIB are the personal Internet banking and business Internet banking applications. Any user with a valid checking, savings, mortgage, loan etc. can login into PIB website and can perform online transactions. The site provides various options like viewing accounts, registers, transfers, pay bills, email, customer service and changing profile. BIB provides online banking services for businesses and gives additional options like ACH Payments, Wire Transfers, Access & Security features and Activity Logs. The objective of this project is to test the future releases of PIB / BIB functionality and as well regression tests the applications.

Responsibilities:

- Test Scripting
- SIT Test Case Execution.
